

Misskittygirl's Sumptuous Soaps

What are these ingredients?

Our glycerin soaps may contain the following ingredients.

Glycerin - 100% Vegetable Certified Kosher Glycerin

Sodium Cocoate - Sodium salts compounded with coconut fatty oils.

Sodium Palmitate - From Palm oil Non-detergent surfactant

Sucrose - Pure Organic Sugar

Propylene Glycol - Derived from vegetable glycerin or seaweed. The most common moisture carrying ingredient other than water used in cosmetics because it moisturizes better than glycerin. Is used as a wetting agent and surfactant which gives a product better absorption and promotes spreading of the product on the skin. Propylene Glycol is an emollient.

Dionized Water - chlorine and all toxic ions are removed

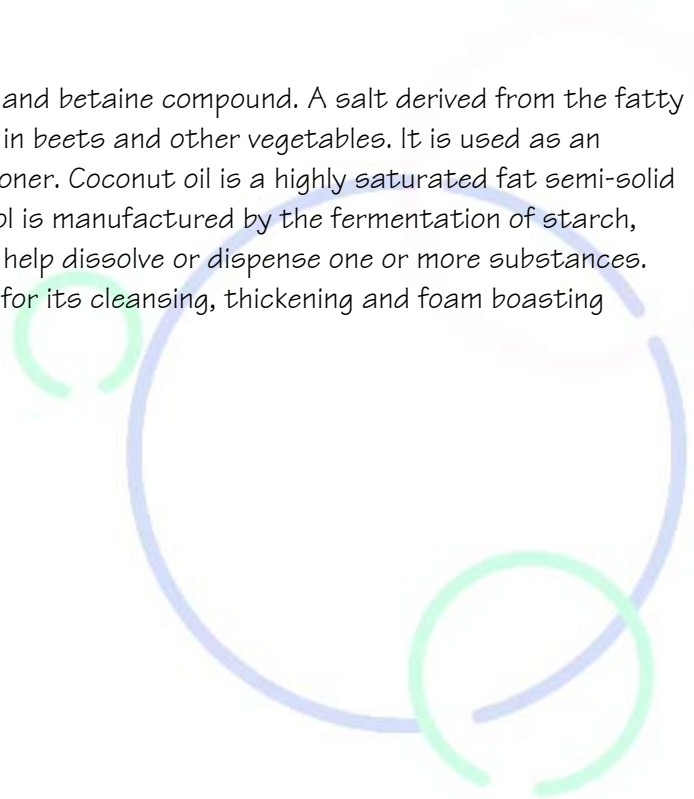

TEA Lauryl Sulfate - A mild, high foaming, anionic cleanser. It is free-rinsing and hard water resistant.

Acetamide MEA - Used as a Stabilizer.

Cocamidopropyl Betain - A coconut oil, alcohol and betaine compound. A salt derived from the fatty acids of coconut oil. Betaine occurs commonly in beets and other vegetables. It is used as an emulsifier, thickener, foam booster and conditioner. Coconut oil is a highly saturated fat semi-solid oil derived from the kernels of coconuts. Alcohol is manufactured by the fermentation of starch, sugar or any other carbohydrate. It is used to help dissolve or dispense one or more substances. Commonly used in shampoos and conditioners for its cleansing, thickening and foam boosting properties.

Titanium Dioxide - makes clear base White *

(* Only for white soap)

****Unless noted otherwise, soaps are vegan friendly and are vegetable coconut based.****
Fragrance Oils are proudly made in the USA and we only use phthalate-free scents
Made with cruelty free & vegetable-derived ingredients
